

SEJAL SUNIL KADAM

Mumbai, India | +91-9324214592 | sejal.mbaa25135@iimkashipur.ac.in | [LinkedIn](#) | [Portfolio](#) | IIM Kashipur

PROFESSIONAL SUMMARY

MBA candidate with a software engineering foundation, skilled at breaking down business problems into data-backed recommendations. Experience spans statistical forecasting and BI dashboards for supply chain decisions, GenAI/LLM pipelines for operational efficiency - backed by platform engineering experience in live product environments. Seeking full-time roles in Supply Chain, Analytics, or Consulting

EDUCATION

Indian Institute of Management (IIM), Kashipur 2025 - 2027
Master of Business Administration (MBA), Analytics | Pursuing

Maharashtra Institute of Technology, Pune 2019 - 2023
Bachelor of Technology (B.Tech), Computer Science | CGPA: 9.53/10.0

WORK EXPERIENCE

Godrej Agrovet, Mumbai | *Supply Chain Intern | Manufacturing & Excellence Department* Apr 2026 - May 2026

- Addressed a business-critical demand forecasting gap - sales returns had nearly doubled (17% to 32% over 3 years) due to manager-intuition-driven planning - by building a statistical prediction pipeline across Crop Care, achieving **~22% WMAPE** at annual level
- Performed **ABC-XYZ segmentation** across ~450 SKUs, visualized via a Power BI dashboard adopted by supply chain planners for weekly replenishment decisions; devised models (**Croston, Holt-Winters**) to address intermittent, seasonal, and lumpy demand
- Designed LoadOpt Pro, a **fleet-loading optimization** tool solving 3D bin-packing - gravity-validated placement and dynamic multi-container allocation across 8+ truck types - cutting manual dispatch-planning effort via a 50/50 volume-weight efficiency score

Dure Technologies, Mumbai | *Associate Software Engineer* July 2023 - Feb 2025

- Led a high-stakes legacy-to-modern platform migration on an enterprise healthcare system within an aggressive 4-week window - delivering **30% performance** improvement and **10-15% infrastructure cost** reduction with zero critical post-migration incidents
- Enabled healthcare data interoperability by engineering **20+ FHIR-compliant interfaces**, streamlining cross-system data exchange and reducing integration friction for downstream healthcare partners
- Strengthened regulatory compliance and application security by identifying and remediating **10+ vulnerabilities** through VAPT audits
- Orchestrated **15+ integration pipelines** while overseeing agile delivery across 4 cross-functional teams - accelerating release velocity and aligning sprint planning with product roadmap goals

BizAmica Software Pvt Ltd., Pune | *Software Intern* July 2022 - Dec 2022

- Tackled a high-touch, error-prone industry problem - manual processing of high-volume multilingual documents across banking, retail, and logistics - by contributing to an **AI-driven Cognitive Document Processing** platform enabling auto-classification at scale
- Processed **1000+** documents using OCR/ICR, automating extraction across structured, semi-structured, and unstructured formats
- Built a **computer-vision**-based signature verification model for a nationalized bank, achieving **90%+** fraud detection accuracy - strengthening document-fraud controls in high-compliance banking environment
- Collaborated across **5+** live client engagements, driving **ML/NLP**-led workflow automation that improved KPI tracking by 40%

PROJECTS

Agentic AI Control Tower for Inventory Exceptions | *Agentic AI, Demand Sensing, Inventory Optimization, Python, LLM API*

- Eliminated late, manual detection of stock-outs and overstock by building an **AI agent** on a public retail dataset (~300 SKUs) that flags at-risk SKUs from demand and inventory signals and drafts actions (expedite, transfer, reorder) for planner approval
- Achieved ~80% recommendations on 50 simulated exceptions, with **human-in-the-loop approval** and an audit log for every action
- Projected **~15% fewer stock-outs** at the same inventory level and ~5 planner hours saved per week, with a rollout case & risk checks

UPI Payments Growth Strategy for a Challenger Bank | *SQL, Python, Unit Economics, Scenario Modelling, Tableau*

- Diagnosed a mid-sized bank's UPI gap by benchmarking public NPCI data (36 months, 40+ banks) on share, technical decline rates and growth momentum, sizing a **~4 pp share gap worth ~₹2,400 Cr** in monthly transaction value
- Modelled unit economics (cost per transaction, incentive dependence, cross-sell revenue per user) and stress-tested **3 growth strategies** (merchant acquisition, credit-on-UPI, reliability-led retention) on break-even and 3-year payback
- Recommended a phased plan led by a reliability fix (~1.5 pp lower decline rate), projecting **~₹900 Cr** annual volume and **~₹18 Cr** revenue recovered, delivered as a Tableau dashboard and a 2-page leadership memo

SKILLS

Data & Analytics: Python, SQL, Power BI, Tableau, Excel, EDA, ETL, Business Analytics, Statistics and Hypothesis Testing, Regression

Supply Chain & Operations: Demand Forecasting, Segmentation, Inventory Management, Logistics, Lean Six Sigma, Time Series Analysis

AI & ML: Machine Learning, Deep Learning, RAG, Vector Databases, LangChain, Prompt Engineering, GenAI, LLM Evaluation, Agentic AI

Management & Tools: Agile/Scrum, Jira, Cloud Fundamentals, MongoDB, Git, Product Lifecycle Management, Stakeholder Management

CERTIFICATIONS

Lean Six Sigma Green Belt | SQL (Hackerrank) | Elements of AI | Microsoft PL-300 | Advanced Excel | Google Project Management

LEADERSHIP & EXTRA-CURRICULAR

- Exchange Coordinator, International Relations Committee, IIM Kashipur** (2025-Present): Coordinated exchange programs with 10+ global universities and led international events/MUNs for 150+ participants; facilitated a 32-student exchange to Alba, Greece
- Organizing Committee Member, Aarohan, MIT-WPU** (2019-2021): Drove execution of a flagship cultural fest - including Comedy Nite and Theatre Fest - for 1,000+ attendees, mobilizing 200+ volunteers across drives including Tree Plantation and Blood Donation
- Published IEEE paper on '[Star Galaxy Classification using Deep Learning](#)' (2024), a CNN model achieving ~95% classification accuracy
- Volunteered with iVolunteer (NGO) (2019): Delivered interactive educational and life-skills sessions for 55+ underprivileged children
